13)	_____	1	2	3	4	
14)	_____	1	2	3	4	
15)	_____	1	2	3	4	

**INSTRUCTIONS:**

1. **LIST** each player.
2. **CIRCLE** a skill level for each player based on the following:  
 1- Needs Improvement 2- Fair 3- Very Good 4- Excellent.  
 Skill level should be judged against the entire division, not just the players on your team.
3. Next **RANK** each player in order from the player that needs the most improvement (will receive a 1) to your best player (who will receive the highest number determined by the number of players you have. For example if you have 6 players, your best player will get a 6, your second best player will get a 5, your next best player will get a 4, and so on... until your least skilled player receives a 1.
4. **RETURN** the completed form when picking up player awards.
